## EDUCATION

### Thapar Institute of Engineering & Technology

B.E. in Computer Engineering | CGPA: 7.3 / 10

Patiala, India

Aug. 2023 – May 2027

- **Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Machine Learning, Computer Vision, Software Engineering
- **Finance Electives (Year 3):** Derivative Markets, Financial Statement Analysis, Candlestick Patterns, Corporate Cash Flow Modeling

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, C++, C, SQL, HTML, CSS

**Frameworks & Libraries:** Flask, SQLAlchemy, React, Chart.js, TensorFlow, OpenCV, scikit-learn, pandas, NumPy

**AI / LLM:** Google Gemini API, Groq API, Llama 3.3 70B, Prompt Engineering, Sentiment Analysis, LLM Integration

**Databases:** PostgreSQL, Supabase, MySQL, SQLite

**Tools & Deployment:** Git, Render, Vercel, PWA, REST APIs, Bcrypt Authentication

## PROJECTS

### LeadPilot | *Flask, PostgreSQL, Gemini API, JavaScript, PWA* | [Live](#) | [Code](#)

- Built a full-stack AI-powered CRM with a 5-stage Kanban sales pipeline supporting drag-and-drop status updates and real-time deal value tracking.
- Integrated **Google Gemini API** to power three AI features: lead scoring (0–100), personalized cold-email drafting, and pipeline health insights with recommended next actions.
- Designed a normalized PostgreSQL schema on Supabase with Bcrypt auth and activity-timeline logging; deployed as an installable PWA on Render.

### StockPulse | *Flask, Groq (Llama 3.3 70B), Finnhub, NewsAPI, PWA* | [Live](#) | [Code](#)

- Engineered a real-time AI stock signal engine ingesting live prices from **Finnhub** and news headlines from **NewsAPI**, classifying sentiment (Bullish / Neutral / Bearish) with numeric scores via **Llama 3.3 70B on Groq**.
- Built Compare Mode for up to 4 tickers with signal-strength gradients, BUY / HOLD / SELL verdicts, confidence levels, and sentiment-history tracking via interactive SVG charts.
- Deployed as a PWA on Render with service-worker caching for near-instant repeat loads.

### PennyWise | *Flask, PostgreSQL (Supabase), Chart.js, Bcrypt* | [Live](#) | [Code](#)

- Developed a full-stack finance tracker with category-wise analytics, monthly budgets with 90% threshold alerts, auto-computed savings rate, and filtered CSV export.
- **Migrated production database from SQLite to Supabase PostgreSQL**, eliminating data loss caused by Render's ephemeral filesystem and ensuring persistence across redeloys.
- Debugged multi-layer production issues (Jinja inheritance, context processors, DB migration) via structured log analysis; built interactive Chart.js dashboards with dark mode.

### Invisible Watermarking | *Python, OpenCV, TensorFlow, DWT, SVD, CNN* | [Live](#) | [Code](#)

- Contributed to an 8-member cross-functional team (4 SW + 4 HW) building a robust image watermarking system combining DWT + SVD embedding with a CNN-based decoder.
- Owned **pipeline integration and testing** across 200+ test images, achieving **PSNR > 38 dB** while maintaining recoverability under noise and compression.

## CERTIFICATIONS & LEADERSHIP

- **Gen-AI Robust & Invisible Watermarking**, Thapar Institute of Engineering & Technology (2025)
- **Mobile Application Development**, Thapar Institute of Engineering & Technology (2024)
- **brAInwave Hackathon**, Delhi Technological University (2024)
- **AIESEC in Thapar — Executive Member, Marketing:** Executed outreach campaigns for chapter events; coordinated content, on-ground logistics, and cross-team collaboration.
